Jesse, I edited Section 2.4.2 within the Draft 2018 GLOEMMP to note the potential LNAPL observed in CTL MW-05. Let me know if that meets your needs.

Thanks, Kara

Hello Jesse, the draft GLOEMMP indicates possible LNAPL in CTL MW-5. No water quality samples were taken as only water level measurements are scoped in the GLOEMMP for PZ-1 through PZ-3. I added water level monitoring for the additional OU2 wells to the scope. As you noted, we did scope sampling of CTL MW-05 for TPH in our draft RI Scoping Tech Memo to further investigate. I agree, this will be investigated in the RI with the water quality sampling.

Can we proceed with finalizing the Draft 2018 GLOEMMP?

I'll give you a call shortly as well per your message.

Regards, Kara

Hello Kara and Fonda:

The report does not discuss the LNAPL observed in CLT MW-5. Although it doesn't appear to be related to the maintenance of the liner, it is an environmental concern to be addressed. The tech memo does incorporate the well in its suggested sampling. I suggest that you discuss the observation along with the reference to the sampling during the RI.

Let me know if you have any questions.
